Professional Summary

Passionate and curious IT enthusiast pursuing a Bachelor's in Information Technology, with hands-on experience as an IT Specialist. Skilled in problem-solving, technology troubleshooting, and leveraging AI to optimize workflows. Eager to contribute to innovative IT projects while growing in a collaborative and dynamic environment.

Work Experience

IT Intern - Maico LTD Trade and Technologies

Software Engineer (Front-End & Mobile focus)

- **Cross-Platform Application Development** Engineered a full-stack **institutional cash-request application** using **Flutter** for the frontend and **Node.js/MongoDB** for the backend. Implemented a responsive UI with custom theme management and integrated complex state handling to streamline internal financial requests.
- **UI/UX Design & Prototyping** Translated complex project requirements into high-fidelity interactive prototypes using **Figma**. Applied modern design principles and **Tailwind CSS** logic to create intuitive user interfaces for platforms like *Dukorane Events*, focusing on Rwandan market accessibility.
- **API Integration & Backend Connectivity** Architected secure communication between mobile clients and RESTful APIs. Managed database connectivity using **MongoDB SRV records** and handled cloud deployment processes on platforms like **Render**, ensuring 99.9% uptime for application services.
- **Technical Problem Solving & Optimization** Resolved critical rendering and algorithmic bottlenecks, including the optimization of computer graphics scripts and the implementation of efficient data fetching patterns in Flutter to improve app performance and reduce latency.
- **Mentorship & Technical Documentation** Authored comprehensive technical documentation and study modules (utilizing **Anki**) for core JavaScript and Flutter concepts, supporting peer learning and ensuring team alignment on modern development standards like **ES6+** and **Clean Architecture**.
